DRY PIT PUMPING EQUIPMENT

Horizontal and vertical mounted centrifugal pumps for sewage lift stations, raw sewage pumping, sludge pumping, trash pumping, clean water booster applications and self-priming pumps.

POSITIVE DISPLACEMENT PUMPS

Netzsch provides both progressive cavity pumps and rotary lobe pumps.

VERTICAL TURBINE, MIXED FLOW AND SCREW PUMPS

Propeller and mixed flow pumps for storm water, flood control, irrigation and effluent pumping. Vertical turbine pumps for low service, high service and water booster systems Archimedes screw pumps.

SUBMERSIBLE PUMPING EQUIPMENT AND SUBMERSIBLE MIXERS

Sewage lift stations, grinder pump stations and storm water pumping equipment, 1/3 HP thru 1400 HP. Submersible mixers for various applications throughout WWTP and wet wells.

GRINDERS

Best –in-class technology for wastewater solids reduction. JWC provides inline or channel grinders designed to shred the toughest solids. These will result in shorter pump run cycles and lower electric costs.

SCREENS & DRUM THICKENERS

Monster Separation Systems by JWC are able to remove a wide variety of solids from small debris to heavy slugs of debris and material. Four products offered include Bandscreen Monster, Bar Screen Monster, Chain & Rake Monster, Finescreen Monster and Drum Thickeners.

PACKAGED PUMPING STATIONS

USEMCO provides above and below ground water booster stations, valve vaults and meter vaults; flooded suction, below grade sewage lift stations and above grade vacuum primed sewage lift stations.

STATIC MIXER

Komax Inline Static Mixer provides an energy-efficient solution in the process pipeline industry by effectively mixing process fluids to produce a homogenous output. The process stream flow provides all the energy required to complete the mixing with no motors, moving parts or auxiliary power needed, eliminating excess maintenance and downtime within the existing pipeline.

CONTROLS

From simple level and pressure control systems to variable speed drive systems to basic telemetering to fully integrated SCADA systems. We also offer automatic telephone dialing alarm systems by Sensaphone.

STAINLESS STEEL SLUICE AND SLIDE GATES

Golden Harvest offers a complete line of high quality sluice gate and water control equipment, including sluice gates, flap gates, weir gates, channel gates and stop logs of stainless steel construction.

ODOR CONTROL & FOG REMOVAL

The VAPEX odor control system with its patented air atomizing three-fluid nozzles enhance the Advanced Oxidation Process by creating hydroxyl radicals (OH), the most potent oxidant used in odor treatment. Reliant Water Techologies' Wet Well Wizard helps eliminate FOG and odors with it's patent pending aeration tube. Using bipolar ionization, Air+ helps control odors and reduce corrosion by proactively attacking H_2S and other corrosive gases in WWTP buildings, tanks and lift stations.

UV DISINFECTION

Enaqua Non-Contact UV disinfection system using short wave length UV energy in lamps contained separately from the water to neutralize harmful microorganisms.

SERVICE

Flow-Technics, Inc. is a complete factory authorized repair service center which also offers vibration testing, flow testing and flowmeter certification, laser alignment, service and maintenance contracts and confined space permitted procedures.
